

The week-long celebrations commenced with a safety pledge being taken by every employee dedicating themselves to ensuring the Safety, Health & Environment protection and also causing no harm to the reputation of the organisation through their deeds. This was followed by various activities related to Safety, Health and Environment protection which have been listed below:

### Exhibition of safety & fire-fighting equipment at all sites

The first activity was an exhibition of the various safety and fire-fighting equipment used at all sites in times of emergencies.

Exhibition of safety and fire-fighting equipment

Fire drill in action

### Section wise competition for best team of fire fighting

A contest to check the performance of the team in case of a fire emergency was also conducted at all the sites. As a part of the contest a team of five people were to be judged on the following:

- Total time taken by team to extinguish the fire
- Correct actions to unwind the fire hose, fixing of two nos. fire hose with branch nozzle, fire-fighting actions, etc.
- Time taken to shift the victim from affected site via stretcher

### Inter site safety quiz competition

A safety quiz competition was organised on March 10, 2021 at the Conference Hall of HPLAE wherein six teams participated – two each from HPLAB, HPLAD, and one team each from HPLAE and HO.

Besides these the plant witnessed various other activities too like:

- Distribution of safety and health policies to employees
- Fire mock drills
- Training on fire safety
- Mock drill on handling Ammonia leakage

Overall, it was an informative and eventful safety week imparting the necessary knowledge to all employees.
