

Celebrating The World Environment Day!

Like every year, despite the lockdown, HPL Additives made it a point to show their commitment to the planet by observing the World Environment Day at the HPLA-D and HPLA-B plant site on June 5, 2021. In accordance with the theme of this year – ‘Ecosystem Restoration’, the organisation planned a plantation drive. Trees and saplings were planed across both the plant sites by the enthusiastic employees. Extensive social media promotions were also done to commemorate the special day.
